Sciences, Hosur Road, Bengaluru, 560029

DISCHARGE SUMMARY

UHID : 20220048112
Name: MR. SUNITI MUKHERJEE
Age/Sex: 40 years 4 mons 2 days / Male
Ward Name: Stroke General AC ward - SSB
Admission Id: RMV BLOCK
Date of Admission: 20227191
13/05/2022 02:12:00 PM
Discharge Summary
Preparation Date: 23/05/2022 05:51:20 PM
Discharge Date:
Discharge Type : Regular Discharge

MRD No: N986631
Department: Neurology
Unit: N V
Name Of the Doctors: Dr. Girish B Kulkarni - Professor
and Unit Head
Dr. Ajay Asranna - Assistant
Professor
Dr. Subasree R - Additional
Professor
Dr. Raghavendra K - Associate
Professor

Diagnosis

Recurrent Cerebrovascular accident -?Large vessel
vasculitis - Right hemispheric watershed infarcts

ICD Code

Description-

History

This 41 year old gentleman, a Policeman, came with complaints of recurrent episodes of sudden onset left sided weakness in August 2020 and in March 2022.
In August 2020, patient had sudden onset left sided weakness. He was evaluated INS Kolkatta. MRI Brain showed right ICA segment narrowing from the origin with watershed infarcts. Digital subtraction Angiography showed Right ICA bifurcation stenosis of 70 percent with right MCA occlusion. Provisional diagnosis of CNS vasculitis was made. He was started on MMF and oral steroids which was tapered and stopped in 4 to 5 months.
In March 18, 2022 - patient had a road traffic accident followed which had sustained head injury and loss of consciousness for 10 mins. He noticed left sided weakness of his limbs which slowly improved over a period of 10 days. Currently he is independent of all activities.
he was not a diabetic or hypertensive. He is a smoker and alcoholic

Examination

Patient is conscious, oriented.
MMSE - 30/30
Spasticity of left upper and lower limb
Power- left upper limb proximal- 2 to 3/5 distal- 1 to 2/5
Left lower limb - proximal -4/5, distal 4/5
Sensory - normal
peripheral pulses - normal

Investigations

Date	Investigation	Result
13-05-2022	ALBUMIN / GLOBULIN RATIO AG RATIO SERUM	2.00
13-05-2022	ALBUMIN SERUM	5.10
13-05-2022	ALKALINE PHOSPHATASE ALP SERUM	88
13-05-2022	BILIRUBIN TOTAL SERUM	0.40
13-05-2022	CHLORIDE SERUM	101.1
13-05-2022	CHOLESTEROL TOTAL SERUM	146.0
13-05-2022	CREATININE SERUM	0.9
13-05-2022	FOLATE SERUM	10.66

PATIENT'S NAME : Suniti Mukherjee
REG. NO. : 277216
IPD ADMIN NO. : 277216/1
BED NO. : 713
CONSULTANT : Dr. Sidharth Shankar Anand (MD, DM)
Dr. Chiranjib Das
MD (Medicine), DM (Neurology)

AGE : 39 Years
SEX : Male
FLOOR : 7th
D. O. A : 20.08.2020
D. O. D : 28.08.2020

DISCHARGE CERTIFICATE

Diagnosis:

- (1) CNS VASCULITIS (ICD - 167.7)
- (2) LEFT PARESIS CAUSE ISCHAEMIC CEREBROVASCULAR ACCIDENT (ICD - A52.17, I63.50)

History:

This 39 years old gentleman presented here with complaints of weakness in left sided limbs.

On Examination:

- GCS - E₄V₅M₅
- Pupil - Bilateral 2+ reacting to light
- Power - Left upper limb - 1/5, Left lower limb - 3/5
- Plantar - Bilateral ↓↓

Investigations:

- All the investigation reports are enclosed herewith in details

[Due investigation reports, if any, may be collected from Dispatch Counter between 9am - 12pm & 3pm - 6pm]

Summary of Clinical Course during Hospital Stay:

After admission all the relevant investigations were done and the patient was managed conservatively.

Procedure:

DSA was done under LA on 24/08/2020.

Findings:

- Stenosis is seen in right ICA bifurcation with right MCA occlusion seen in origin.
- Right ACA lesion via A.COM and right ACA-MCA and PCA -MCA collateral
- Rest all normal.

Impression: Vasculitis

Condition at Discharge:

- Stable

Advice at the time of Discharge:

1. Tablet ATORVA (40 mg) - 1 tablet once daily at bed time to continue. (N)
2. Tablet ECOSPRIN (150 mg) - 1 tablet once daily to continue. (M)
3. Tablet TELMA (20 mg) - 1 tablet once daily to continue. (M)
4. Tablet REJUNEX CD3 - 1 tablet once daily to continue. (M)
5. Tablet LEVIPIL (500 mg) - 1 tablet twice daily to continue. M/N
6. Tablet CELLCEPT (500 mg) - 1 tablet twice daily to continue. M/N
7. Tablet PAN (40 mg) - 1 tablet once daily before breakfast to continue.
8. Tablet OMNACORTIL (40 mg) - 1 tablet once daily to continue. (N)
9. Capsule CALDKIND PLUS - 1 capsule once daily to continue. N
10. Syrup DUPHALAC (20 ml) - once daily at bed time (till normal stool) (N)
11. Rehabilitation to continue.
12. The possible side effects of the prescribed medicines have been explained to the relatives of the patient.
13. Review with Dr. Siddharth Shankar Anand after 4 weeks in OPD. [For Appointment please Dial 7605081283 (10-5 pm)].
14. Review with neuro-rehabilitation department (physiotherapy, occupational therapy, speech & language therapy) as advised. [For Appointment please Dial 9830964646, 9831609950, 7605081287].
15. In case the patient shows signs of high fever, convulsion, drowsiness, sudden weakness of limbs, loss of speech / vision, bleeding from operation site, allergic reactions etc, please contact Emergency Department (033-4030-9998/9999).
